

A birthday,

a dinner with friends, a children's party or simply because you feel like eating at a table that looks nice... sitting down at a lovingly decorated table is something that everyone enjoys and makes the occasion feel extra special. Create a playful and casual effect by randomly placing the leaves on the table, as if they have just fluttered down on it. Are you setting the table outdoors? Make sure the paper leaves do not fly away by putting a glass or plate on them. Or arrange them into a bouquet under a vase or a bowl.

Styling idea

Liven up your table setting by adding some living plants, seedlings and flowers between the paper decorations and crockery.
